

# The Trademaster

from AJC Retail Solutions

## Class leading, high output catering trailers.

The Trademaster is now one of the most popular of our deluxe range of catering trailers and represents the ultimate in trailer build technology and durability. Our light insulated GRP panels save weight and have added strength for larger openings, and better insulation properties.

The Trademaster is also available with an electric hydraulic lowering suspension system from Europe's leading suspension manufacturer AL-KO. Low level serving is ideal for caterers operating in town centres and at shows and events. Hydraulic trailers include integrated gas box, and are either single or twin axles.

The Trademaster can be further enhanced with our wide range of optional extras such as lighting systems, special colours and graphics, display boards, stainless steel variations, built-in generators and many others.

# The Trade master

Class leading, high output catering trailers

## VISUALISE YOUR TRAILER

The design process is critical to taking your ideas to reality. The design and layout of your unit and selection of appropriate equipment are critical to your business success.

Once we have a clear understanding of your needs, we will provide you with a line by line quote along and discuss the potential layout of your unit.

Once the order is finalised, we can then produce a 3D drawing giving you detailed information for your approval, along with presentation visuals if desired.
