

Heavy Duty School Kiosks

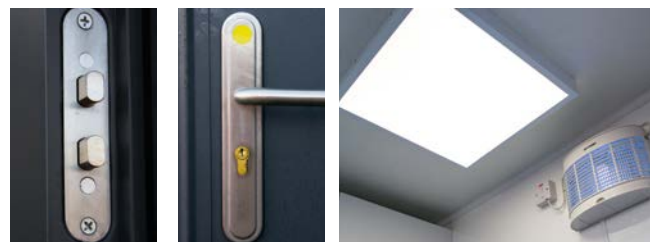

from AJC Retail

Designed and built for school sites

The benefits of using kiosks in schools to provide additional food preparation areas, tackling school food issues and overcoming peak time serving issues are well known. Where an enclosed, highly secure school location is available a traditional AJC School Kiosk is suitable

Some school environments are based in less secure, more open areas and in these locations a Heavy Duty Steel Kiosk can provide a more resilient kiosk solution. The solid steel construction with steel rounded corner pillars combined with the multi point locking access door provide a robust and tough exterior Internally stainless steel surfaces and checker plate can be used to create a kiosk that is tough enough for school use inside and out.

We offer bespoke, quality kiosk designs for busy school environments. We manufacture and source a huge range of catering equipment so that you can maximise your return on your investment. Kiosk sizes from 2.5m upwards.

VISUALISE YOUR TRAILER

The design process is critical to taking your ideas to reality. The design and layout of your unit and selection of appropriate equipment are critical to your business success.

Once we have a clear understanding of your needs, we will provide you with a line by line quote along and discuss the potential layout of your unit.

Once the order is finalised, we can then produce a 3D drawing giving you detailed information for your approval, along with presentation visuals if desired.
