

The Low loader

from AJC Retail

Class leading, high output catering vans.

The response to the Low-loader continues to be overwhelming. From lay-by and town centre trading to shows and events the Low-loader is a flexible alternative to a catering trailer, with no taco-graph issues.

The AJC Low-loader is built on a new chassis cab which comes with 12 month road fund license and manufacturer's warranty.

This range is manufactured from 15mm dry freight panels. Built to the same specification as the Trademaster plus additions, further details can be found on our web site.

Body size from 14ft. We can also convert your existing van into a Low-loader.

The Low loader

Class leading, high output catering vans

CUSTOMER SUPPLIED VAN

VISUALISE YOUR VEHICLE

The design process is critical to taking your ideas to reality. The design and layout of your unit and selection of appropriate equipment are critical to your business success.

Once we have a clear understanding of your needs, we will provide you with a line by line quote along and discuss the potential layout of your unit.

Once the order is finalised, we can then produce a 3D drawing giving you detailed information for your approval, along with presentation visuals if desired.
